BARNSTORMERS

MARKET OVERVIEW

Complete in-budget result set - ranked for first-pass buyer diligence

The filtered search returned exactly five aircraft. Ranking emphasizes maintenance transparency, engine position, airframe condition, equipment, useful load, and price - not cosmetics alone.

Rank	Year / Price	Aircraft	Engine	Primary watch item
1	1969 / \$59,000	Sparks, NV - 5,332 TT	653 SMOH	Verify spar AD / history
2	1974 / \$59,900	Bucyrus, OH - 3,230 TT	1,100 SMOH	IRAN + prior incidents
3	1972 / \$69,900	Alabama - N15148	1,402 SMOH	High TT + gear collapse
4	1973 / \$59,500*	Meriden, CT - N8741N	1,801 SMOH	Near-term engine reserve
5	1966 / \$60,000	Kenly, NC - 3,800 TT	Not stated	Major information gaps

Recommended next move

Start with the 1969 Nevada aircraft and the 1974 Ohio aircraft. Ask each seller for digital logs, 337s, AD compliance, annual inspection details, weight-and-balance, oil analysis if available, and a written damage-history statement before scheduling travel or a prebuy.

* Current listing header; the same ad body says \$59,999.

1969 Piper Cherokee PA-28-140

Rank #1 | Barnstormers ad 2060428 | Posted July 14, 2026

RANK #1

\$59,000

Sparks, Nevada | Private owner

Barnstormers seller photos

AIRFRAME 5,332 hr TTAF	ENGINE 653 hr SMOH	ANNUAL Nov. 2025
COMPRESSIONS 78 / 79 / 77 / 77	AVIONICS ADS-B; Levil BOM	RECORDS Complete logs claimed

WHY IT RANKS HERE

Best overall value in the current set. The combination of moderate total time, low engine time, complete-log claim, strong reported compressions, current annual, and dry-climate hangaring gives it the strongest first-pass profile.

VALUE SIGNALS

- Lowest reported engine time in the five-aircraft set.
- Seller claims complete logs, no corrosion, and consistent maintenance.
- Good fit for training, time building, or economical cross-country use.

VERIFY BEFORE TRAVEL

- Confirm damage history and the PA-28 wing-spar AD status in the logs.
- Verify what the Levil BOM installation provides and whether panel equipment meets the intended mission.
- Annual becomes due in November 2026 if the stated date is accurate.

Barnstormers seller photos

AIRFRAME 3,230 hr TTAF	ENGINE 1,100 hr SMOH	RECENT WORK 75 hr since IRAN
ANNUAL Due June 1, 2027	USEFUL LOAD 768 lb	CONFIGURATION Front seats only

WHY IT RANKS HERE

The lowest-time airframe and a long remaining annual window make this a compelling value candidate. A recent IRAN following low compression is potentially positive, but the scope and results need close logbook review.

VALUE SIGNALS

- Lowest reported airframe time in the comparison.
- All logbooks since new claimed; ADS-B Out and updated Garmin radio.
- Annual and transponder certification reported current.

VERIFY BEFORE TRAVEL

- Reported damage history in 1976 and an NTSB incident in 1985.
- Obtain IRAN work order, cylinder details, and post-work compression/oil data.
- Only two seats installed; confirm parts and approval path if rear seats are desired.

Alabama | Barnett Investment Group - broker

Verified cross-listing photos - Trade-A-Plane

AIRFRAME 9,438-9,440 hr TTAF	ENGINE 1,402-1,405 hr SMOH	PROPELLER 1,397 hr SPOH
USEFUL LOAD 826 lb	ANNUAL April 2026	INTERIOR / EXTERIOR 8/10 / 6/10

WHY IT RANKS HERE

The best-documented panel and equipment package after the top two, with a fresh annual, IFR equipment, ADS-B transponder, new 2023 Airtex interior, and an 826-pound useful load. Its price, high airframe time, and damage history reduce the value edge.

VALUE SIGNALS

- Cross-listing provides registration, serial number, equipment, and maintenance detail.
- IFR-equipped with Appareo ESG, dual NAV/COM capability, and four-place intercom.
- Fresh annual and attractive 2023 interior.

VERIFY BEFORE TRAVEL

- Hard landing and gear collapse reported in 1974; verify repair documentation.
- High total time and mid-to-late engine life require careful structural and engine review.
- Barnstormers and cross-listing show different Alabama cities; confirm aircraft location.

1973 Piper Cherokee 140 - N8741N

Rank #4 | Barnstormers ad 2056334 | Posted June 24, 2026

RANK #4

\$59,500*

Meriden, Connecticut | Markham Aviation Services

Barnstormers seller photos

AIRFRAME 7,073.95 hr TTAF	ENGINE 1,801.05 hr SMOH	PROPELLER 248.05 hr SMOH
ANNUAL Fresh; date not stated	ENGINE 150 hp Lycoming	MODIFICATION Power Flow exhaust

WHY IT RANKS HERE

A usable trainer/time-builder candidate with a fresh annual, strong reported compressions, and low propeller time. The engine is close to the common 2,000-hour planning benchmark, so purchase economics depend heavily on condition and reserve.

VALUE SIGNALS

- Competitive displayed price and seller-reported clean condition.
- Fresh annual and strong compressions claimed.
- Low propeller time and Power Flow exhaust.

VERIFY BEFORE TRAVEL

- Engine at 1,801 hours SMOH materially increases near-term overhaul exposure.
- Sparse information on avionics, logs, damage history, useful load, and annual date.
- Price conflict: header shows \$59,500 while body text says \$59,999; confirm asking price.

No photos supplied in the listing

AIRFRAME 3,800 hr TT	ENGINE Not stated	ANNUAL Not stated
AVIONICS ADS-B; 2 NAV/COMs	RECORDS Not stated	PRICE TERMS OBO

WHY IT RANKS HERE

Potential sleeper because of its low reported total time and simple avionics package, but it ranks fifth because the ad omits engine time, maintenance status, logs, useful load, damage history, and all photos. It needs a documentation package before travel.

VALUE SIGNALS

- Second-lowest reported total time in the set.
- ADS-B and two NAV/COMs claimed.
- Owner indicates the price is negotiable.

VERIFY BEFORE TRAVEL

- No listing photos; seller instructs buyers to email for pictures.
- No engine/prop times, annual date, log status, damage history, or useful load.
- Clarify the ad's phrase 'light sport'; a standard Cherokee 140 is not normally treated as an LSA.
